Portfolio Update

For the week ended 27th December 2013, the Fund continued its conservative position. The marginal decline in the portfolio value was primarily due to softness in Turkish bonds in wake of graft charges against incumbent government. The fundamentals of Turkish banks continue to be robust with high CAR (capital adequacy ratio) and low & stable NPL (non-performing loans).

The Fund declared dividend of 3% per annum *pro rata* for the period of 13 weeks ending 27th December 2013 (being the last Friday of calendar quarter), which is payable on the Dealing Day: Monday, 30th December 2013.
