PORTFOLIO UPDATE

During the week ended 29th December 2017, Silverdale Fixed Income Fund maintained its conservative position.

The Fund continues to invest and book profit opportunistically for its target duration adjusted returns, details of which shall be shared in the communiques of ensuing weeks.

During the year 2017, Silverdale Fixed Income Fund gave returns of 4.62% to the investors; contributed primarily by coupon interest earned.

There was no change in fund strategy: we continue to maintain our conservative positioning with circa 81.7% of our investments in Investment Grade US dollar bonds (2016: 82.5%) with weighted average duration of 2.45 years (2016: 2.05 years).

During the year, our high conviction purchases in resources industry did well, resulting in Brazilian, US and Swiss credits becoming the key contributors to our performance; while Chinese, United Kingdom, and Hong Kong credits were the key drags. The diversification of the investments across 12 countries (2016: 9 countries) helped us to manage the market gyrations.

We expect the term premium and quality premium to emerge late 2018, and we are well positioned to capitalize on it with higher quality credits and short portfolio duration.

May we take this occasion to thank you for your support, and wish you health, happiness and good fortune in 2018 and years to come!
