RISK FACTORS

Interest Rate Risk: As the interest rates rise or credit spread increases, the price of existing fixed income securities fall, and vice versa. **Liquidity Risk:** No secondary public market for the sale of Fund shares exists, nor is likely to develop. **Credit Risk:** Risk that the issuer of fixed income security may default on interest payment or principal amount on maturity. **Country Risk:** Geographical, political, economic and social issues of the country of the Issuer. **Capital Risk:** Some of the amount invested in portfolio securities may be lost. **Derivatives Risk:** The use of derivatives amplifies the return of portfolio. **Portfolio Illiquidity:** The securities invested into may lack a liquid trading market, which may result in the inability to realize fair market price of the securities. For details on the Risk Factors, please read the Offering Document.

DISCLAIMER

The above commentary does not provide a complete analysis of every material fact regarding the market, industry, security, portfolio or the fund. It is not a recommendation to buy or sell any security nor an investment advice. The portfolio holdings, opinions and information may change without notice.
