OVERVIEW

Silverdale Fixed Income Fund is actively managed for stable returns and quarterly distributions; the portfolio duration is kept low to manage interest rate risks and credit risks. During the week ended 4th May 2018, the Fund NAV declined by 0.38% to US\$ 103.36 (previous week: US\$ 103.75), taking portfolio yield to 4.90% per annum (previous week: 4.93% p.a.) with average duration of 2.10 years (previous week: 2.22 years). The key drivers of fall in NAV were knee-jerk reaction of Chinese credits to deferment of maturity payment by about two months by a Chinese LGFV (not held by Fund), and general widening of Turkish credits.
