During the month of June 2024, the Fund NAV increased by 0.94% as against the Bloomberg Emerging Market USD Corp and Quasi 1-3 Yr Index which increased by 0.64%. The increase in NAV was primarily due to Indian, British and American credits, partly offset by French credits. Sectorially, Financial, Consumer Cyclical, and Energy were the key contributors. The increase in NAV was also partly offset by the mark-to-market losses from interest-rate swaps (IRS) as market priced in higher rate cuts.
